**Discussion:** A PA was completed by EPA/FIT on 10/31/90.

The investigation of this site was prompted by a petition received from Mr. David Howell of Cabot, Arkansas and Mr. Wilson Tolefree, Deputy Director, Arkansas Department of Pollution Control and Ecology.

The 118.25 acres site, operated between 1975 and 1987. It was used primarily for the disposal of domestic, commercial and institutional wastes. The facility was cited by the State for exceeding permitted boundaries, leachate problems and overall poor conditions.

Industrial wastes have been disposed at the site (One State report documents thirty-four 55 gallons drums labeled as paint stripper or contact adhesive) and hazardous wastes may have been disposed on the site. Conducting a Screening Site Inspection is recommended.
